Paweł Mikołajek

Product Designer & Builder

Szczecin, Poland | pwmikolajek@gmail.com | www.linkedin.com/in/rejnold | dribbble.com/dsgnpvmik | pwmikolajek.github.io

Summary

I’m a designer who works at the seam between design, motion, and front-end. I came up through agency and brand work (Aromen, Webstacks, Ogilvy clients) and now design and build internal product tools at Human Made.

My day-to-day spans Figma systems, UI components, and prototypes; After Effects and Lottie when something needs to move; and React, TypeScript, and Tailwind when a flat mockup isn’t enough. I write live prototypes with Claude Code so people can use a working surface.

Experience

Product Designer & Builder, Human Made

Matlock, UK | Aug 2022 – Present

- Sole designer in the agency, designing and shipping in a fast-paced, cross-functional environment.
- Created and maintained the central Figma design space, promoted as the repository for the agency and its product, Altis Cloud.
- Designed UI components and prototypes; built motion-led marketing assets and brochures.
- Designed and helped build a portfolio of internal product tools, several of which are featured at pwmikolajek.github.io.

Creative Designer, Webstacks

San Diego, US | Mar 2021 – Aug 2022

- Worked inside the design department through agile sprints and daily stand-ups.
- Designed UI components and contributed to a broader, multi-product design system.
- Produced vector illustrations in Figma and Illustrator, plus SVG-friendly web animations in After Effects + Lottie.

Multimedia Designer, Aromen BVBA

Wevelgem, Belgium | Jan 2018 – Jul 2022

- Led cross-media projects across branding, illustration, and UI for the Aromen App and webshop (WooCommerce, later Odoo).
- Built a complete label and packaging system across hundreds of product lines.
- Produced 3D mockups, exhibition collateral, signage, and the company’s catalogues and decks.

Selected projects

Deal Room (2026)

Product design, Frontend

One link for the latest files and the next agreed step. A working prototype of a shared client space, with a focused client view and publishing tools for the team behind it.

Stack: React, TypeScript, Tailwind, Vite, Base UI

Sparrow (2026)

Design, Frontend, Backend

Shared PDF review for the team. Pin feedback to the page, reply and resolve in place, and keep the conversation across drafts, with clear links to the latest or an exact version.

Stack: React, TypeScript, Tailwind, Express, SQLite

Letter Clash (2025)

Design, Frontend, Backend

A real-time multiplayer word game built for the team, with a 20-second turn clock, live ghost tiles from your opponent, and a server that owns the rules.

Stack: React, TypeScript, Vite, WebSocket, SQLite

HM Brand Guidelines (2024 to present)

Design systems, Frontend, Agent workflows

From a static reference to a brand suite for people and agents. Shared tokens, editorial guidance and practical tools bring Human Made's brand into the conversation and the work.

Stack: Design tokens, JavaScript, Node.js, Agent skills

Skills

Design: Figma, Design systems, Prototyping, UI components, Iconography, Brand systems

Motion: After Effects, Lottie, SVG animation, Micro-interactions, Storyboards, Motion principles

Frontend: React, TypeScript, Next.js, Tailwind, Live prototypes, Claude Code

Tools: Figma, Adobe Photoshop, InDesign, After Effects, Lottie, Sketch, React, TypeScript, Next.js, Tailwind, Claude Code

Worked with

HubSpot, DJI, Human Made, Webstacks, Ogilvy
